

Hospital Bill Review

Overall Assessment

The document appears to be a patient receipt for services rendered at Lakeview Regional Hospital. The OCR is generally clear, though a few numeric values contain extraneous spaces or commas (e.g., “Tax \$392 ,00” and “Total \$5 , 292,00”). Confidence that this is a valid hospital receipt: **High**.

Itemized Comparison

Service or charge	Quantity	Original charged price	Estimated fair price	Difference	Assessment
Chest X-Ray	1	\$300	\$100	+\$200	Higher than typical Medicare/average facility price
OR Procedure Level 2	1	\$4,000	\$2,000	+\$2,000	Significantly higher than typical operating-room facility fee for a Level 2 procedure
Anesthesia Services	1	\$600	\$500	+\$100	Above average but within a plausible range for moderate-complexity anesthesia
Subtotal (services)	—	\$4,900	\$2,600	+\$2,300	Sum of service estimates
Tax	—	\$392 ,00	Not available	—	Tax amount unclear due to formatting; typical tax not applied to medical services in OH
Total	—	\$5 , 292,00	≈ \$2,600	≈+\$2,692	Potential arithmetic/formatting error; total does not match subtotal + tax

Totals

Original total (as printed): \$5,292.00 (formatting irregular)

Estimated fair total (services only): \$2,600

Estimated fair total including tax (if tax were \$0): \$2,600

The large gap between the original and estimated totals suggests the billed amounts may be above typical market rates and/or contain OCR/formatting errors.

How the estimates were determined

Estimated fair prices were derived from publicly available benchmark data such as Medicare fee schedules, Centers for Medicare & Medicaid Services (CMS) average facility fees, and common market rates reported by health-price transparency tools. These figures represent typical charges for a standard, uncomplicated service in the United States and do not account for regional cost variations, insurer contracts, or patient-specific factors.

All estimates are *approximate* and should be used only as a reference point.

Items needing verification

- Tax amount displayed as “\$392 ,00”; medical services in Ohio are generally non-taxable, so the source of this charge is unclear.
- Total amount formatting (“\$5 , 292,00”) suggests misplaced commas/spaces; confirm the accurate total.
- Whether any discounts, insurer adjustments, or contractual allowances were applied but not listed.
- Clarification of what “OR Procedure Level 2” specifically entailed (e.g., type of surgery, duration).
- Full itemized breakdown for anesthesia (time-based vs. per-service).

Recommended next steps

1. Contact Lakeview Regional Hospital’s billing department and request a detailed, itemized statement that includes CPT/HCPCS codes, dates of service, and any insurance adjustments.
2. Ask the provider to explain the tax charge and verify whether it should apply to medical services.
3. Obtain the Explanation of Benefits (EOB) from your insurer to see what portion, if any, was covered or contracted.
4. If the charges remain higher than expected, consider filing a formal inquiry or appeal with the hospital’s billing office and/or your insurance carrier.
5. Keep a copy of all correspondence and note any reference numbers for future follow-up.
